Summary

Recent Computer Science graduate with hands-on experience across the full software development lifecycle, from design through testing and deployment. Proficient in C++ with additional experience in backend development and scripting. Analytical problem-solver who thrives on understanding complex systems, collaborating cross-functionally, and delivering results through execution.

Education

UNIVERSITY OF UTAH, Salt Lake City, UT
Bachelor of Science in Computer Science

2026

Projects

Agora

Federal Legislation Tracker - agoraforthethepeople.net

- Architected and maintained a relational database storing data on 10,000+ bills and 2,500+ politicians, with a focus on query efficiency and data integrity. Deployed and managed backend services on a Linux cloud server, handling environment configuration and system-level operations. Developed and documented REST API endpoints in collaboration with front-end engineers, participating in Agile sprint cycles and peer code reviews.

Dishbook

Recipe & Cooking Website

- Designed and built a full-stack web application end-to-end, from database schema through frontend views, deployed on AWS. Implemented server-side routing, backend logic, and database integration using Django and Python. Gained practical experience with the full software development lifecycle across a multi-layer system architecture.

Work Experience

Student Safety Driver

UNIVERSITY OF UTAH, Salt Lake City, UT

JAN 2022–PRESENT

- Delivered reliable transit services to diverse user groups, including ADA passengers, maintaining high service standards and positive user experiences.

Technical Skills

- C++, Python, SQL, JavaScript, TypeScript, HTML, CSS
- Technologies & Tools: Git/GitHub/GitLab, Docker, Linux, CI/CD, API Development, AI Tooling
- Software Development Lifecycle (SDLC), Test-Driven Development, Agile/Scrum, Security Practices
